OVERVIEW

Global economic and financial developments

The main advanced economies' central banks left their policy rates unchanged during November 2016. The Fed, at its FOMC meeting on 1-2 November 2016, kept its benchmark interest rates steady at 0.25-0.50 per cent, as expected. The Fed Chairperson, Janet Yellen, indicated to a congressional panel that an interest rate increase was likely to be "relatively soon." US economic growth was revised upwards for the third quarter of 2016 to 3.2 per cent, from an earlier estimate of 2.9 per cent. The European Central Bank kept its expansionary monetary policy stance intact as the Euro zone economic growth remained modest and inflation at low levels. In the UK, economic data releases broadly failed to deliver signs of the rapid slowdown many had expected after the June 2016 referendum. At its Monetary Policy Committee meeting on 2 November 2016, the Bank of England (BoE), voted unanimously to hold the base rate unchanged at 0.25 per cent and stated that another interest rate cut later this year was no longer an option. In its Quarterly Inflation Report, the BoE revised upwards its inflation and economic growth projection for 2017.

In November 2016, the US dollar strengthened against major currencies reflecting the rise in US Treasury yields and heightened expectations of enlarged fiscal spending. At the beginning of the month, the US dollar was pressured ahead of the US presidential elections on 8 November 2016. Thereafter, the greenback strengthened and reached a 13-1/2-year high against the euro as yields on US Treasuries marked their largest gains in more than five years. Expectations that newly elected US President's administration would adopt expansionary fiscal policies, which would usher in higher inflation and faster-than-expected Federal Reserve interest rate increases, boosted the US currency. The euro traded at an average of US\$1.0806 in November 2016 compared to US\$1.1028 in October 2016. The euro started the month strongly, reaching a high of US\$1.1262, given the US dollar's weakness. Thereafter, the single currency dropped to a low of US\$1.0544 on 24 November 2016, on the back of interest rate differentials, expectations that accommodative monetary policy could be extended and political uncertainty in the euro area. The Pound sterling rallied in November 2016 as the BoE moved away from a rate cut and hard Brexit prospects took a hit after the UK High Court's ruling that parliament must vote to start the exit process. On 30 November 2016, the British currency touched a high of US\$1.2655. The Pound sterling traded at an average of US\$1.2444 in November 2016 compared to US\$1.2352 in October 2016.

In November 2016, the US equity markets hit record highs as the newly elected US President indicated that he would spend massively on infrastructure and bring simpler business regulations. The MSCI Global Equity Index rose by 1.3 per cent while MSCI Emerging Markets Index and MSCI Developed Markets Index went up by 4.7 per cent and 1.8 per cent, respectively. The Dow Jones and NASDAQ increased by 5.4 per cent and 2.6 per cent, respectively. Among the European market indices, CAC-40 and DAX went up by 2.4 per cent and 1.1 per cent, respectively while FTSE shed 2.5 per cent. The NIKKEI increased by 5.1 per cent. Among emerging markets, the Shanghai Exchange Composite gained 4.8 per cent while Bombay SENSEX, JALSH and Hang Seng lost 4.6 per cent, 0.8 per cent and 0.6 per cent, respectively.

Both international energy prices and food prices fell in November 2016. ICE Brent Crude averaged US\$47.4 a barrel in November 2016, down from US\$51.4 a barrel in October 2016. NYMEX WTI (West Texas Intermediate crude oil) averaged US\$46.1 a barrel in November 2016, down from US\$49.9 a barrel in October 2016. The Food and Agriculture Organisation's (FAO) Food Price Index went down from 172.0 points in October 2016 to 171.3 points in November 2016, or by 0.4 per cent, but was still 10.4 per cent above the corresponding period a year earlier. Except for dairy and oils, prices of all other commodities, namely meat, cereals and sugar decreased in November 2016.

Domestic developments

The tourism sector kept momentum in November 2016, with the number of tourist arrivals increasing by 9.0 per cent, from 106,204 in November 2015 to 115,782 in November 2016. This performance was underpinned by an increase of 12.0 per cent in arrivals from Europe, with major source countries like France, UK and Germany recording increases of 3.5 per cent, 3.1 per cent and 35.7 per cent, respectively. Tourist arrivals from Asia showed an increase of 8.4 per cent with arrivals from India recording 8.5 per cent growth. Tourist arrivals from Africa, however, decreased by 3.4 per cent, with the number of visitors from Reunion Island up by 9.1 per cent but down by 18.9 per cent from South Africa. For the period January to November 2016, tourist arrivals increased by 10.7 per cent to 1,127,093 compared to a growth of 11.0 per cent recorded during the first eleven months of 2015.

Latest CPI data released by Statistics Mauritius showed that the domestic inflation rate picked up marginally in November 2016. Headline inflation edged up from 0.8 per cent in October 2016 to 0.9 per cent in November 2016 while y-o-y inflation went up from 1.5 per cent to 2.2 per cent. The core measures of inflation remained at low levels in November 2016.

The annual growth rate of Broad Money Liabilities (BML) accelerated further in October 2016. Monetary expansion, measured by the year-on-year growth rate of Broad Money Liabilities (BML), grew by 9.2 per cent in October 2016, up from 8.9 per cent in September 2016. Year-on-year growth in banks' credit went up from 2.1 per cent in September 2016 to 2.8 per cent in October 2016. The annual growth rate of monetary base was almost flat in October 2016 as against an expansion of 9.2 per cent in September 2016.

Government securities for a total nominal amount of Rs6,500 million were issued during November 2016. The Bank issued Government of Mauritius Treasury Bills (GMTBs) for a total nominal amount of Rs3,800 million, of which Rs1,100 million was issued for liquidity management. Auctions of GMTBs held in November 2016 were oversubscribed with bid cover ratios ranging between 1.64 to 2.18 as compared to 1.7 to 2.25 for October 2016. Over the same period, maturing GMTBs amounted to Rs6,025.1 million. Between end-October and end-November 2016, weighted yields on the 91-Day, 182-Day and 364-Day maturities increased by 17, 10, and 13 basis points to 2.65 per cent, 2.75 per cent and 2.93 per cent, respectively. The overall weighted yield increased by 8 basis points, from 2.60 per cent in October 2016 to 2.68 per cent in November 2016. ⁵ The National Accounts data from 2006 are based on the 2013 Census of Economic Activities.

⁶ Data as from 2005 onwards refer to all banks and are not strictly comparable with prior years' data.

⁷ As from 2010, balance of payments includes cross-border transactions of GBC1's and are not strictly comparable with prior data.

⁸ As from 2007, Gross Official International Reserves exclude the Bank's foreign equity participation in international organisations.

⁹ As from 2010, data are no longer adjusted for claims on Global Business Licence holders and are not strictly comparable with prior data.

@ As from 2010 to 2014, government finance statistics were compiled on a calendar year basis, spanning from January to December. From 2006 to 2009 and as from 2016, the financial year for government finance statistics spanned from July to June of the following year. Estimates for 2015 are for the 6 months January to June. As from 2008-09, government finance statistics are compiled using the IMF's GFS Manual 2001.

Note: Following IMF recommendations in January 2013, with effect from January 2010, liabilities to Central Government now include deposits of budgetary central government, extra-budgetary units and social security funds, as well as their holdings of Mauritius securities, which were formerly classified as "Deposits and Securities Other than Shares, Excluded from Monetary Base".

As from 2009, data refer to end-June, instead of end-June for previous years.

¹The Central Bank Survey (CBS) is derived from the sectoral balance sheet of the Bank of Mauritius. The CBS contains data on all components of the monetary base, which comprises the central bank liabilities underlying the monetary aggregates of the economy. The monetary base comprises all bank notes and coins in circulation and deposits of banks, non-bank deposit taking institutions and other non-depository corporations with the Bank of Mauritius.

²Following IMF recommendations in January 2013, with effect from January 2010, liabilities to Central Government now include deposits of budgetary central government, extra-budgetary units and social security funds, as well as their holdings of Bank of Mauritius securities, which were formerly classified as "Deposits and Securities Other than Shares, Excluded from Monetary Base". Figures may not add up to totals due to rounding.

Notes:

(i) The Mauritius Exchange Rate Index (MERI), which is a weighted average of bilateral exchange rates for the Mauritian rupee, is a summary measure of the rupee's movements against the currencies of its important trading partners.

(ii) The choice of currencies has been influenced by the importance of the currency distribution of trade flows of Mauritius with the rest of the world.

(iii) Two indices have been derived: MERI1 and MERI2. MERI1 is based on the currency distribution of merchandise trade, while MERI2 is based on the currency distribution of merchandise trade and tourism earnings.

(iv) The base year of the MERI is January - December 2007 = 100.

(v) An increase (decrease) in the index indicates a depreciation (appreciation) of the rupee.
