## OVERVIEW

### Global economic and financial developments

**Major advanced economies' central banks kept their policy rates unchanged during September 2017 but were looking forward to reduce their monetary stimulus on the back of the ongoing global upswing.** After the two-day policy meeting on 19-20 September 2017, the US Federal Reserve left interest rates unchanged as expected, but signalled that the Federal funds rate could be raised further by the end of the year, despite the recent bout of low inflation. The US Fed also said that it would start as from October 2017 to reduce its holdings of around \$4.2 trillion in U.S. Treasury bonds and mortgage-backed securities that it acquired after the 2008 financial crisis. On 7 September 2017, the European Central Bank (ECB) reaffirmed its ultra-easy policy stance by retaining rates at record lows and kept its monthly asset purchases at 60 billion euros, despite the improvement in economic data. At the press conference after the monetary policy meeting, President Mario Draghi said that ECB was working on a plan to reduce its monthly asset purchases. The ECB also opted to lower some of its inflation projections due to the firming euro. Economic data releases were rather positive and compared to previous quarters, consumer and government consumption as well as investment spending were slightly higher. On 14 September 2017, the Bank of England (BoE) kept unchanged both its benchmark interest rate at 0.25 per cent and government bond purchases at £435 billion. The majority of BoE's monetary policy committee members viewed that some withdrawal of the monetary stimulus would be appropriate over the coming months in order to keep inflation close to the Bank's target.

**In September 2017, the US dollar and the Pound sterling regained some ground, while the euro lost momentum amid political worries.** The US currency rebounded on improving investors' risk sentiment as worries over North Korea and Hurricane Irma receded. Higher U.S. Treasury yields also bolstered the US dollar. Towards the end of the month, the greenback rose on renewed hopes over U.S. tax reforms as well as comments from US Federal Reserve Chair Janet Yellen who stressed on the need for gradual interest rate hikes despite some uncertainty over the path of inflation. The euro traded at an average of US\$1.1912 compared to \$1.1814 in August 2017. At the start of the month, the single currency rose after ECB policymakers agreed that their next step would be to reduce their bond buying programme. Thereafter, the euro lost ground on political worries and rising tensions in Catalonia, Spain. Towards the end of the month, the results

of the German elections weighed on the euro after the Chancellor Angela Merkel won a fourth term in office, albeit she would have to build a coalition to form a government. The UK currency started the month from a low of US\$1.2914 and reached a high of US\$1.3582 on 22 September 2017. The Pound sterling soared on speculation that the BoE may sound more hawkish on interest rates at its next monetary policy meeting. Uncertainty about the outcome of the Brexit negotiations and Moody's downgrade of Britain's credit rating weighed on the UK currency. The Pound sterling traded at an average of US\$1.3295 in September 2017 compared to US\$1.2970 in August 2017.

**In September 2017, major equity markets were supported as risk appetite remained firm on the back of better economic data releases and renewed hopes for US tax reforms, overshadowing political concerns.** Gains in technology and energy stocks pushed US equities to new highs. The MSCI Developed Markets Index and MSCI Global Equity Index rose by 3.9 per cent and 2.1 per cent, respectively, while MSCI Emerging Markets Index fell by 0.5 per cent. The Dow Jones and NASDAQ increased by 2.1 per cent and 1.1 per cent, respectively. Among the European market indices, DAX and CAC40 gained 6.4 per cent and 4.8 per cent, respectively, while FTSE lost 0.8 per cent. The NIKKEI increased by 3.6 per cent. Among emerging markets, the JALSH, Hang Seng, Bombay SENSEX and Shanghai Exchange Composite lost 1.7 per cent, 1.5 per cent, 1.4 per cent and 0.4 per cent, respectively.

**Global oil prices and food prices picked up in September 2017.** ICE Brent Crude averaged US\$55.5 a barrel in September 2017, up from US\$51.9 a barrel in August 2017. NYMEX WTI (West Texas Intermediate crude oil) averaged US\$49.8 a barrel in September 2017, up from US\$48.1 a barrel in August 2017. The Food and Agriculture Organisation's (FAO) Food Price Index (FFPI) went up by 0.8 per cent, from 177.0 points in August 2017 to 178.4 points in September 2017, reflecting higher prices of vegetable oil and dairy products. Compared to end-September 2016, the FFPI was higher by 4.3 per cent.

## Domestic economic and financial developments

**Real GDP grew by 4.1 per cent year-on-year in 2017Q2, after increasing by 3.4 per cent in 2017Q1.** Investment in building and construction work recorded a buoyant growth of 9.4 per cent in 2017Q2, while investment in machinery and equipment rebounded. Growth in household consumption also increased during the quarter, while growth in general government expenditure slowed. However, exports of goods and services continued to decline and remained a drag to real GDP growth. Growth continued to be supported by key services sectors, notably, '*accommodation and food service activities*' (7.3 per cent), '*financial and insurance activities*' (5.7 per cent) and '*information and communication*' (5.5 per cent). In the '*construction*' sector, growth reached a peak of 11.2 per cent in 2017Q2. The '*Manufacturing*' sector grew by 2.6 per cent, driven by a rebound in the textile sub-sector after a weak growth of 0.1 per cent in the previous quarter. For 2017, Statistics Mauritius was expecting real GDP to grow by 3.7 per cent.

**Labour market conditions improved in 2017Q2, reflecting the decline in unemployment rate.**

The unemployment rate decreased from 7.4 per cent in 2016Q2 to 7.2 per cent in 2017Q2, with the number of unemployed persons dropping by 500. This was attributed to a rise in employment of 12,400 which more than offset the increase of 11,900 in the labour force. The unemployment rate for 2017 is projected to fall marginally to 7.2 per cent, from 7.3 per cent in 2016.

**The tourism sector maintained its upbeat performance, with increasing number of tourist arrivals in September 2017.**

Tourist arrivals rose by 4,898 or 5.4 per cent, from 91,384 in September 2016 to 96,282 in September 2017. The pick-up was driven by arrivals from Europe (+2,808 or 5.4 per cent), especially from key source markets like Germany (+1,182 or 11.3 per cent), Switzerland (+753 or 36.1 per cent) and Italy (+257 or 9.7 per cent). However, arrivals from other important markets like the United Kingdom and France edged down by 0.4 per cent and 0.8 per cent, respectively. The two major source markets of the Asian continent witnessed diverging trends with arrivals from China dropping by 13.6 per cent (-1,033) whilst those from India picked up by 7.4 per cent (+374). Tourists from African market surged by 8.0 per cent (+1,528), supported by higher arrivals from South Africa (+1,101 or +11.2 per cent).

**Consumer Price Index (CPI) data released by Statistics Mauritius showed that headline inflation remained on an uptrend while year-on-year inflation subsided for the third consecutive month in September 2017.** Headline inflation went up from 3.0 per cent in August

2017 to 3.2 per cent in September 2017, whereas y-o-y inflation fell from 4.6 per cent to 3.5 per cent. The CPI decreased from 114.4 in August 2017 to 113.4 in September 2017. The main contributors to the fall in the index were vegetables (-0.9 index point), motor vehicles (-0.1 index point), air tickets (-0.1 index point) and other food products (-0.1 index point), more than offsetting increases of 0.1 index point in both cigarettes and other goods and services. Between August 2017 and September 2017, for the twelve-month period, CORE1 inflation went up from 1.2 per cent to 1.5 per cent, while CORE2 inflation edged up from 2.0 per cent to 2.1 per cent.

The annual growth rate of time deposits remained negative, while the other components of BML continued to post significant y-o-y growth rates. <sup>1</sup>The Other Depository Corporations (ODC) covers all institutional units, i.e. Banks and non-bank deposit taking institutions that issue liabilities included in the national definition of broad money. The Other Depository Corporation Survey (ODCS) is derived from the sectoral balance sheets of Other Depository Corporations.

<sup>2</sup> Following IMF recommendations in January 2013, with effect from January 2010, deposits of social security funds and extra-budgetary units, which were formerly included in Broad Money Liabilities (BML), have been re-classified as central government deposits, excluded from Broad Money. Figures may not add up to totals due to rounding.

Notes:

(i) The Mauritius Exchange Rate Index (MERI), which is a weighted average of bilateral exchange rates for the Mauritian rupee, is a summary measure of the rupee's movements against the currencies of its important trading partners.

(ii) The choice of currencies has been influenced by the importance of the currency distribution of trade flows of Mauritius with the rest of the world.

(iii) Two indices have been derived: MERI1 and MERI2. MERI1 is based on the currency distribution of merchandise trade, while MERI2 is based on the currency distribution of merchandise trade and tourism earnings.

(iv) The base year of the MERI is January - December 2007 = 100.

(v) An increase (decrease) in the index indicates a depreciation (appreciation) of the rupee.
