## **OVERVIEW**

### **International Developments**

In June 2012, the US dollar, on average, appreciated vis-à-vis the euro and the Pound sterling but depreciated against the Japanese yen. Concerns about the euro zone fuelled broad demand for the safe haven US currency while the monetary stimulus delivered by the US Federal Reserve by way of an expansion of its ‘Operation Twist’ had almost no impact on the dollar.

The euro depreciated against the US dollar in June 2012, trading at an average of US\$1.2549 compared to an average of US\$1.2798 in May 2012. The euro hit an eleven-month low of \$1.2362 at the start of the month on worries over Spain’s struggling banking sector. The European Central Bank left its key refinancing rate on hold at 1.00 per cent on 6 May. The common currency rose to an intra-month high of \$1.2676 after Greek pro-bailout parties won a slim parliamentary majority. The euro also got some support after European leaders agreed to take emergency action to lower borrowing costs of Italy and Spain and to create a single supervisory body for euro area banks.

The Pound sterling depreciated against the US dollar in June 2012, trading at an average of US\$1.5552 compared to an average of US\$1.5921 in May 2012. Sterling slipped against the dollar on concerns that the euro zone debt crisis would spill over the UK economy, following the release of data confirming that the UK economy was mired in a recession in the first three months of this year.

Global equities posted significant gains in June 2012 as some stronger-than-expected US economic data outweighed worries about the debt crisis and slowing global growth. Over the month, the Dow Jones Industrial Average, NASDAQ, FTSE, CAC-40 and Nikkei rose by 3.9 per cent, 3.8 per cent, 5.0 per cent, 6.0 per cent and 5.4 per cent, respectively. Among emerging stock markets, Bombay SENSEX and JALSH added 8.2 per cent and 1.9 per cent respectively, while Shanghai SEC shed 6.2 per cent.

On the New York Mercantile Exchange, crude oil averaged US\$82.4 a barrel in June 2012, down from US\$94.7 a barrel in May 2012. In London, ICE Brent Crude, on average, fell from US\$110.4 a barrel in May 2012 to US\$95.9 a barrel in June 2012. Both NYMEX and ICE Brent Crude settled at intra-month peaks of US\$85.0 a barrel and US\$ 100.6 a barrel, respectively, on 6 June 2012.

COMEX gold futures averaged US\$1,601.9/Oz in June 2012, up from US\$1,587.9/Oz in May 2012. Gold prices varied in an intra-month closing range of US\$1,550.4/Oz-1,634.2/Oz in June 2012 compared to US\$1,538.9/Oz-1,662.4/Oz in the preceding month. US Gold achieved its high of US\$1,634.2/Oz on 6 June 2012.

## PUBLIC CONSULTATION

### Task Force on Unfair Terms and Conditions in Banking and related Financial Contracts

In line with its mandate to promote orderly and balanced economic development and ensure the stability of the financial system, the Bank of Mauritius endeavours to foster greater competition in the banking industry, enabling financial institutions to exercise more freedom in the business they pursue and the form of services they offer. Ideally, consumers should benefit from a wider choice of banking and financial products, enhanced efficiency in the delivery of services and better value for money.

There is growing evidence, however, from the increasing number and range of complaints addressed to the Bank of Mauritius that consumers either do not understand the full implications of the banking and related financial contracts they commit to, or do not have the correct information at the time they enter into these contracts, or may not be receiving a fair deal.

The Bank of Mauritius is committed to ensure that the best interests of consumers are protected, particularly in the wake of the global financial and economic crisis when consumer protection and financial access have become the subject of concern of central banks around the world.

In this context, the Bank of Mauritius is proposing to investigate into the terms and conditions of contracts, including fees, commission and charges. The objective of this exercise is to gain an in-depth understanding of the terms and conditions governing contracts between a consumer and a financial institution and to help achieve better outcomes.

The Bank of Mauritius is therefore inviting comments from the general public, including non-governmental organisations, welfare and consumer associations as well as banking and real sector operators, to contribute to the exercise.

On the basis of its findings, the Bank of Mauritius proposes to come up with a public consultation document that would encompass key areas that would have been identified for review.

Comments and proposals may be made by email on [taskforce@bom.mu](mailto:taskforce@bom.mu) or in writing to the Chairperson, Task Force on Unfair Terms, Bank of Mauritius, P.O. Box 29, Port Louis. A dedicated help desk ( ☎ 202 3802 or 202 3907) has also been set up to assist members of the public who would wish to make comments in person. The Bank of Mauritius will receive comments and proposals until 31 August 2012.

A parallel exercise is being conducted jointly with the Mauritius Bankers Association to look into the simplification of language used in contracts. The conclusion of this joint endeavour will feed into the public consultation document.

The Bank of Mauritius wishes to reassure the public that all information provided will be treated in strict confidence and looks forward to a fruitful collaboration with all stakeholders.

<sup>#</sup>: The definition of G/R meets the IMF's BPM6 definition of reserves. Reserves are defined as external assets that are readily available to and controlled by monetary authorities. Hence, G/R excludes the Bank's foreign equity participation in international organisations as this does not meet the criteria of readily available reserves.

<sup>1</sup> Valued at end-of-period exchange rate.

<sup>2</sup> In line with the recommendation of the IMF Article IV Mission of January 2012, import cover is no longer computed on imports of goods, cif but based on imports of goods, fob and non-factor services. For further information, please refer to the methodological note that has been released on the Bank's website in its March 2012 Monthly Statistical Bulletin Issue.

Notes:

- (i) The Mauritius Exchange Rate Index (MERI), which is a weighted average of bilateral exchange rates for the Mauritian rupee, is a summary measure of the rupee's movements against the currencies of its important trading partners.
- (ii) The choice of currencies has been influenced by the importance of the currency distribution of trade flows of Mauritius with the rest of the world.
- (iii) Two indices have been derived: MERI1 and MERI2. MERI1 is based on the currency distribution of merchandise trade, while MERI2 is based on the currency distribution of merchandise trade and tourism earnings.
- (iv) The base year of the MERI is January - December 2007 = 100.
- (v) An increase (decrease) in the index indicates a depreciation (appreciation) of the rupee.
