Notes:

<sup>(i)</sup> The Mauritius Exchange Rate Index (MERI), which is a weighted average of bilateral exchange rates for the Mauritian rupee, is a summary measure of the rupee's movements against the currencies of its important trading partners.

<sup>(ii)</sup> The choice of currencies has been influenced by the importance of the currency distribution of trade flows of Mauritius with the rest of the world.

<sup>(iii)</sup> Two indices have been derived: MERI1 and MERI2. MERI1 is based on the currency distribution of merchandise trade, while MERI2 is based on the currency distribution of merchandise trade and tourism earnings.

<sup>(iv)</sup> The base year of the MERI is January - December 2007 = 100.

<sup>(v)</sup> An increase (decrease) in the index indicates a depreciation (appreciation) of the rupee.
